**Extinguishing Media:** Foam, CO<sub>2</sub>, Dry Media

**Special Fire Fighting Procedures:** Wear self-contained breathing apparatus and protective clothing. Cool fire exposed containers to prevent rupturing.

**Unusual Fire and Explosion Hazards:** Exposure to temperature above 120° F may cause bursting.

## SECTION V - REACTIVITY DATA

**Stability:** Material stable, however, avoid open flames & exposure to high temperatures.

**Hazardous Polymerization:** Will not occur.

**Incompatibility:** Incompatible with alkali or alkaline earth metals- powdered Al, Zn, Be, etc.

**Hazardous Decomposition Products:** Hydrochloric and Hydrofluoric acids, carbonyl halides, carbon dioxide, carbon monoxide.

## SECTION VI - STORAGE AND HANDLING

### KEEP OUT OF REACH OF CHILDREN.

For Industrial and Institutional use only.

Store in a cool, dry area away from heat or open flame.

Do not store at temperatures above 120° F.

**NFPA Code 30B Rating:** Level 1 Aerosol.

## SECTION VII - HEALTH AND FIRST AID

### PRIMARY ROUTES OF ENTRY & EFFECTS OF OVER EXPOSURE:

**Eyes:** May cause moderate to severe irritation and frostbite.

**Skin:** May cause frostbite and irritation from defatting of skin. May aggravate existing skin conditions.

**Inhalation:** Inhalation of high concentrations of vapor is harmful and may cause heart irregularities, liver damage, unconsciousness, or death. Intentional misuse can be fatal. Vapors are heavier than air and may accumulate in low lying or confined areas reducing oxygen available for breathing.

**Ingestion:** Not likely to occur because of the physical properties of the product. Ingestion of small amounts is not likely to be hazardous. Ingestion of large quantities would likely cause gastrointestinal discomfort from excess pressure created by rapid evaporation and may result in irritation of the upper gastrointestinal tract.

### FIRST AID PROCEDURES:

**Eyes:** In case of contact, immediately flush with large amounts of lukewarm water for at least 15 minutes while holding upper and lower lids open. Get medical attention.

**Skin:** In case of contact, immediately flush skin with plenty of water for at least 15 minutes. Remove contaminated clothing and shoes. Treat for frostbite if necessary by gently warming affected area. If irritation persists, get medical attention.

**Inhalation:** Immediately remove to fresh air. If not breathing, give artificial respiration. Get medical attention.

**Ingestion:** Ingestion is not likely to occur. If it does, do not induce vomiting. Get medical attention.

**Note to Physician:** Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, should be used with special caution and only in situations of emergency life support. Treatment of overexposure should be directed at the control of symptoms and the clinical conditions.

## SECTION VIII - SPECIAL PROTECTION DATA

**Respiratory Protection:** None needed for proper use in accordance with label directions.

**Ventilation:** Provide local exhaust to keep vapor concentrations of ingredients listed in Section II below established exposure limits.

**Protective Gloves:** Use chemical resistant gloves (neoprene preferred) to help prevent skin contact.

**Eye Protection:** Wear chemical resistant safety glasses or splash goggles.

## SECTION IX - SPILL OR LEAK PROTECTION

**STEPS TO BE TAKEN IN CASE OF SPILL OR LEAK:** Allow propellant to evaporate. Maintain local exhaust and adequate ventilation. No smoking. Keep sparks, heat sources and open flame far away from spill or leak. Cover with absorbent material and sweep up. Wash area to prevent slipping. Dispose of soaked absorbent material in accordance with Federal, State and local laws.

**WASTE DISPOSAL METHOD:** Aerosol cans, when emptied and depressurized through normal use, pose no disposal hazard and should be recycled. Consult Federal, State and local authorities for approved procedures.
